

915 Series Posi-Seal Gasket

The SOVAL 915 Series Posi Seal (+Seal) Gaskets are manufactured to meet AWWA C110 / C111 / C115 Flanged Drilling patterns and designed to match ANSI A21.15 / A21.10 / A21.11.

Posi-Seal Gaskets are 1/8" full faced made from an SBR (Styrene-Butadiene) material that has a maximum temperature of 150°F for water and 125°F for air applications. Posi-Seal Gaskets have been designed with a micro-groove design which provides a water tight seal for all flanged joints. The Posi-Seal Gasket are all marked with our Trademark (+Seal), ANSI 125/150, the Size, the Manufacturer (SOVAL) and Country of Origin.

Posi-Seal physical properties meet ASTM D2240 Durometer Rating of 75 (-/+5) and ASTM D412 with a Tensile Strength of 600PSI and an Elongation value of 175%. Posi-Seal Gaskets from 2"-12" are rated at 300PSI. Our 14" through 24" are rated at 150PSI.

The gaskets shall be Posi-Seal Gaskets Manufactured by SOVAL
